

# FPS-1000 SLICER

Whether you're slicing delicate tomatoes or rigid onions, Grote's new FPS-1000 Slicer is the ideal unit for your fresh-cut produce operation. A band blade slices produce cleanly and evenly for optimal results. It features a 30" (762 mm) wide slicing zone and an easy to clean, sanitary design.

This machine bulk slices at rates up to 120 strokes per minute, per lane. Produce may be continuously loaded into the product holders while the machine is in operation to enhance production output.

Operation of the FPS-1000 is simple. Since this slicer operates in bulk slice mode only, it utilizes basic controls for ease of operation. Functions such as slice thickness and slicing speed are adjusted in an instant with the turn of a knob during operation.

The FPS-1000 is the perfect way to automate your slicing operation. It was designed specifically for the fresh-cut industry, incorporating the needs of today's leading processors.

Model FPS-1000

*Bulk slices fresh produce at rates up to 120 strokes per minute, per lane.*

## AccuBand®

The FPS-1000 utilizes Grote's patented AccuBand® cutting system for optimal slice quality and product yield. AccuBand® cuts with a .5" (12.7 mm) wide razor-sharp band blade running continuously between two pulleys. The blade cleanly and consistently cuts through the entire product to produce the highest yield of usable slices. Most fruits and vegetables can be sliced. These disposable blades eliminate the need for resharpening and simplify the cleanup process.

## Dimensional Drawings

ALL DIMENSIONS ARE APPROXIMATE  
PRIMARY DIMENSIONS IN INCHES

## Features

- Adjustable speed up to 120 strokes per minute, per lane
- Bulk slice mode
- 30" (762 mm) cutting zone; 3.5" (88.9) and 5" (127 mm) product stroke
- Line height of 35" (889 mm)
- Slice thickness adjustable up to 1 1/2" (38.1 mm)
- Easy to operate and maintain
- Auto water blade lubrication system
- Electric drive
- Electrical: 230 V/ 3 phase/ 50/60 Hz
- Utilizes AccuBand® band blade cutting system
- Continuous product loading during operation
- Gravity feed
