

JOHNSON INDUSTRIES INTERNATIONAL

CHEESE SHREDDERS

1000 Series | 7000 Series | 9000 Series

Heavy-duty, versatile shredders that process more cheese, with fewer fines, in less space; giving any growing cheese producer the competitive edge.

More Cheese. Less Waste. Increased Efficiency.

From top to bottom, each element of Johnson Industries International's shredders contribute to producing consistent, customizable shreds. Expertly-designed components, superior manufacturing, automatic loading, and intuitive operation will keep you ahead of the competition by reducing waste and simplifying production.

1000 Series: Durable, low-volume shredder ideal for food-service institutions and multi-store commissaries

7000 Series: Completely electrical operation eliminates inefficiencies common in other mid-sized shredders.

9000 Series: Dual shredding chambers fit 40lb (20kg) blocks to help high-volume cheese producers avoid size reduction before shredding.

Each shredder easily disassembles so daily cleaning is quick and thorough. Johnson Industries expert staff will help keep your shredder running for decades, reducing the amount of hours lost to downtime for service and maintenance.

1000 SERIES

Ideally suited for:
Food Service Institutions
Multi-store Commissaries

Up to 2,000 lbs per hour
(907 kg/hour)

Dual Containment Chambers
14" x 4.5" x 4.5" each
(356mm x 115mm x 115mm each)

14" Shred Wheel
3-spoke or 6-spoke

Dimensions:
60" L x 27" W x 55" H
(152cm x 68.5cm x 140cm)

Mechanicals:
5HP NORDGear motor
Servo drive pusher motor and
drives (VFD) by Baldor
PLC, safety switches, and sensors
by Allen-Bradley
Real time I/O display
Ethernet ready

7000 SERIES

Ideally suited for:
Cheese Processors
Frozen Pizza Production

Up to 8,000 lbs per hour
(3,625 kg/hour)

Single Chamber
7" x 11" x 22" maximum
(178mm x 280mm x 560mm)

31" Shred Wheel
Standard or Hi-Flow

Dimensions:
101" L x 45" W x 68" H
(257cm x 114cm x 173cm)

Mechanicals:
25HP NORDGear motor
Pusher motor, drives, controls,
switches, and sensors by
Allen-Bradley
HMI standard
Real time I/O display
Ethernet ready

9000 SERIES

Ideally suited for:
Major Brands
Large Production Lines

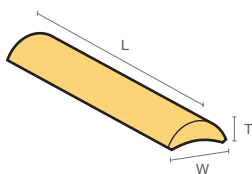

Up to 10,000 lbs per hour
(4,535 kg/hour)

Dual Containment Chambers
24" x 8" x 12" each
(610mm x 203mm x 305mm each)

33" Shred Wheel
Standard or Hi-Flow

Dimensions:
139" L x 48" W x 71" H
(353cm x 122cm x 180cm)

Mechanicals:
40HP NORDGear motor
Pusher motor, drives, controls,
switches, and sensors by
Allen-Bradley
HMI standard
Real time I/O display
Ethernet ready

User-Controlled Shred Dimensions

All shredders feature a half-moon shred with controllable length, width, and thickness. Flaking and grating options are also available (cheese dependent).

DEDICATED TO THE DAIRY INDUSTRY

All shredders from Johnson Industries can shred the whole loaf, wheel or block. Specialized containment centers produce a consistent shred length while reducing fines. Expert design ensures these shredders are safe, virtually maintenance free and easy to clean.

Our focus on industry trends and our customers' changing needs allows us to react quickly, enabling you to capitalize on market opportunities and conditions. We are committed to exceeding your expectations and becoming a valued long-term partner to your organization.
