

Freedom

6500 Series

HIGHLIGHTS

- » Rotating arm systems allow for wrapping unstable loads at high speeds without shifting the product
- » Dual Power Hydro-Stretch™ provides infinite control of film on the load and at the pallet/load interface, increasing load security and film savings
- » High speed wrapping arm and heavy duty design provide efficient and reliable operation
- » Add-on options and customizable features ensure the system is designed to wrap your loads effectively

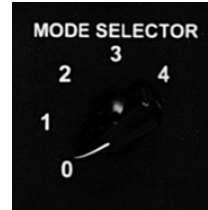

PREMIUM FEATURES

Dual Power Hydro-Stretch

A feature exclusive to Highlight Industries, This system provides two independent levels of pre-stretch: one for the bottom of the load, the other for the rest of the load. Dual Power Hydro-Stretch™ allows you to set the two levels separately for differences in your pallet and load profile, and bring the film to its optimum level.

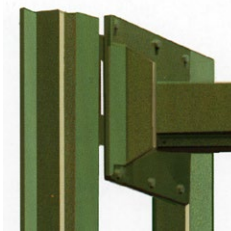

Wrap Modes

Multiple wrapping patterns allow the flexibility to wrap any type of load correctly, and reduce product damage while shipping.

High Speed Rotary Arm

High speed 15 RPM rotary arm allows fast application of film and increased productivity.

Heavy Duty

Structural steel tubing support arm, 1/8" formed steel rotary arm, and 14 gauge formed steel channel tower make the Freedom 6500 built to last.

Custom Design

Highlight will customize your machine using a wide range of options available, giving you the features you need to optimize production.

CONTROL PANEL FEATURES

- Allen-Bradley Programmable Controller
- Free-Standing NEMA 12 Enclosures
- Start
- Stop
- Film Assist
- Carriage Raise/Lower
- Carriage Speed
- Wrap Mode Selector
- Cycle Counter
- Wrap Counter
- Carriage Auto/Banding
- Arm Home/Jog and Run Alert

SYSTEM SPECIFICATIONS

Dual Power Hydro-Stretch™	Fully Adjustable up to 500% Stretch	Drive System	3/4 HP DC Rotary Arm Drive
Rotary Arm Speed	15 RPM Standard	Frame Construction	14 Gauge Formed Steel Channel Tower
Maximum Product Size	40"x48"x84"	Arm Construction	1/8" Formed Steel Rotary Arm
Safety	Audible/Visual Warning Signals and Object Sensor	Shipping Weight	2,500 Pounds
Film Capacity	10" Diameter, 10"-20" Roll Width	Electrical	120 VAC, 20 Amp, Single Phase
