All the Best Ideas in One Great Machine

If a team of stretch film experts and automation experts teamed up and wrote down what a brilliant Stretch Wrapper should have, this is exactly what they would come up with

Advantages that make this the brilliant choice

DUAL SPEED ROLL CARRIAGE: Faster speed up for stabilizing irregular profile loads; slower down speed for securing load

SELF DIAGNOSTICS: Built-in troubleshooting self diagnostics

POWDER COATED PAINT: Why should your stretch wrapper look used up after a year of usage? Plus use of powder coated paint helps eliminate VOCs from atmosphere.

MARKET LEADING PLC: There are reasons we use Allen Bradley PLCs. Here are two: reliability and nationwide accessibility.

SHHH... QUIET: Don't add to the din of your operation. No clanging chains or noisy casters here.

WARRANTY: 3 years on components; 5 years on frame. It's like a European luxury car without the price.

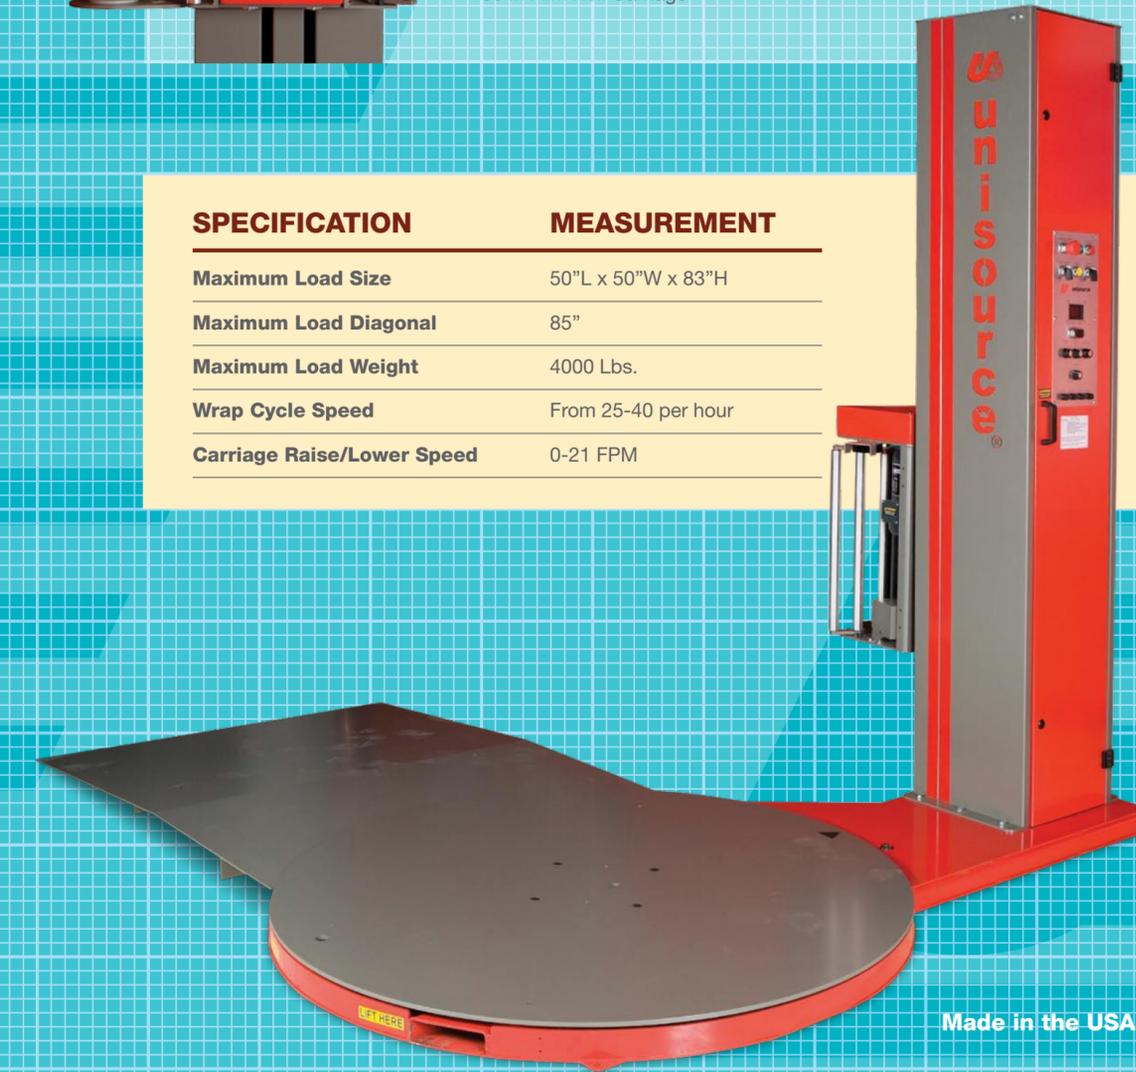

Unisource Automatic Stretch Wrapper

Additional Options

- Access Ramp
- Extended Wrap Height Capacity (to 110 in.)
- Automatic Film Tear Module
- 30 in Film Roll Carriage

| SPECIFICATION | MEASUREMENT |
|----------------------------|---------------------|
| Maximum Load Size | 50"L x 50"W x 83"H |
| Maximum Load Diagonal | 85" |
| Maximum Load Weight | 4000 Lbs. |
| Wrap Cycle Speed | From 25-40 per hour |
| Carriage Raise/Lower Speed | 0-21 FPM |

Made in the USA
